

Dear Sir/Madam,

We are pleased to invite you to participate in

The 13th International Conference on Measurement that will be held from 17 to 19 May, 2021 in the [Smolenice Castle](#) situated in Small Carpathian mountains near Bratislava, Slovakia. The main topics of the conference will cover three areas:

- **Theoretical Problems of Measurement,**
- **Measurement of Physical Quantities,**
- **Measurement in Biology and Medicine.**

Authors of selected papers will be invited to publish their manuscript in extended form in the impacted **on-line journal Measurement Science Review** published by Sciendo, de Gruyter company and indexed in Current Contents Connect, Thomson Scientific SSCI, Scopus, EBSCO and several other databases.

Traditionally also the **Young Investigator Award (YIA)** competition for researchers not older than 35 years will be organized.

Call for Special sessions

In 2019, the conference hosted "Special sessions" which were specialized in the following selected research topic.:

- Methods for Measurement Evaluation in Metrology
- Imaging Methods of Biological Objects
- Causal Relations in Measured Data
- Advanced ECG Measurement, Simulation and Evaluation

In 2021 we would like to continue with this trend and offer the conference attendees an opportunity to promote their research themes. Therefore, we would like to announce a **call for Special sessions**, the proposals will be evaluated and approved by the International Program Committee.

In order for a Special session proposal to be considered, it should identify a theme and at least three presenters. If selected, their presentations will be officially invited.

The list of the selected Special sessions will be included in the 2nd announcement. Therefore other participants can join the Special session if their topics fits the theme of the session. A session will consist of up to six presentations.

When proposing the special session, please use the following format:

Names, email addresses, affiliation and short biographies (500 characters) of the organisers who are expected to have a PhD degree.

Title of the session, the aim of the session, a list of proposed invited speakers who agreed to have an oral presentation at the conference. The Special session participants should submit in time a 4-pages abstract which will be reviewed like any other conference submission (for details on abstract submission rule and format see www.measurement.sk/M2021)

Please, send the proposals by email to Measurement2021@savba.sk no later than **30th November 2020**. The organisers of the selected sessions will be notified before **20th December 2020**.

For more information see the Conference web site: www.measurement.sk/M2021

Preliminary confirmed **keynote speakers** are:

- Isabel van Driessche, Ghent University, Department of Inorganic and Physical Chemistry, Belgium
- Peter Tino, School of Computer Science, The University of Birmingham, UK
- Robert Hatala, The National Institute for Cardiovascular Diseases, Arrhythmias and Pacing, Bratislava, Slovakia

In case the travel restrictions due to the Covid-19 pandemic situation still persist at the time of the conference, the conference will go online or hybrid and the Proceedings will be issued as usual.
